

# ERP System For Employee Management

Group No: 7

Presented By:

Saif Inamdar

Isha Owalekar

Anam Quraishi

Under The Guidance Of:

Guide : Prof. Kiran Deshpande

Co-Guide : Prof. Neha Deshmukh

# Problem Statement

- On-paper(Offline) management of  
Leave Applications,  
Dynamic Duties &  
Institutional Activities.
- Complexity in managing Employee Availability.

# Introduction

This system has been developed to overcome the problems faced in an institute which are broadly classified in:

1. Employee **Availability** Management
2. Employee **Leave** Management

# Project Scope

- **What?**

Web System will be classified broadly into two modules:  
Leave Management.  
Employee Availability Management.

- **Why?**

To Manage Employee Availability & Workload More Efficiently.

- **Where?**

Educational Institute.

- **By Whom It Will Be Used?**

Faculties , HOD , Principal.

# Abstract

The core idea of the project depends on the two main factors:

1. Static Workload
2. Dynamic Workload
  - Outdoor Duty
  - Indoor Duty
  - Exam Duty

Along with Statistics, Reports, Notifications through SMS/E-mail
